

## MEDICAL REPORT

Hospital Name: City Cancer Care Hospital

### Patient Information

Patient Name: Rajesh Kumar Age: 52 Years Gender: Male Patient ID: CCCH-2026-00125 Date of Admission: 05 June 2026 Date of Report: 10 June 2026

### Chief Complaints

- Persistent cough for 3 months
- Unexplained weight loss
- Fatigue and weakness
- Shortness of breath

### Medical History

The patient reported a history of smoking for approximately 20 years. Symptoms began three months ago with a persistent cough and gradual weight loss.

### Diagnostic Findings

CT Scan: A mass measuring approximately 3.5 cm was identified in the upper lobe of the right lung.

Biopsy Report: Histopathological examination confirmed the presence of malignant cells consistent with non-small cell lung carcinoma (NSCLC).

### Laboratory Results

Hemoglobin: 11.2 g/dL White Blood Cell Count: 8,500 cells/ $\mu$ L Platelet Count: 240,000 cells/ $\mu$ L

### Diagnosis

Stage II Non-Small Cell Lung Cancer (NSCLC)

### Treatment Plan

1. Chemotherapy sessions scheduled every three weeks.
2. Radiation therapy as recommended by the oncology team.
3. Nutritional support and regular follow-up.
4. Monitoring through periodic imaging studies.

## **Physician Notes**

The patient is clinically stable and has been advised to begin the planned treatment regimen immediately. Regular follow-up visits are essential for monitoring treatment response and disease progression.

Attending Physician: Dr. Anil Sharma, MD Consultant Oncologist
